Summary

- Senior Product Manager with 5+ years in **enterprise software** and a **software engineering background**, building **B2B** platforms for banks and NBFCs across India, Sri Lanka, Bhutan and the Middle East.
- Shipped 12 platform and AI products from **zero to production**, including a **loan origination system**, a **business rule engine**, an **API connector** and five **AI capabilities** now live in credit workflows.
- **Leading a team of 4 product managers**; own **product strategy** and **roadmap** for core and AI products, from discovery and **prioritization** through delivery and adoption.
- **Running pre-sales** for multi-million-dollar bank deals: **15+ proposals**, a **USD 7M+** pipeline and a **USD 1M+** contract closed end to end.

Skills

Product: Product Strategy, Product Roadmap, Prioritization, Requirements Gathering (PRD, BRD, FSD), User Research, Stakeholder Management, Cross-functional Leadership, Go-to-Market, Pre-Sales and Solution Consulting, Team Leadership and Mentoring

Tools and Technology: JIRA, Confluence, Figma, SQL, Python, Core Java, REST APIs, Oracle Flexcube, TCS BaNCS, Temenos T24

Methods: Agile, Scrum (PSPO I), Design Thinking, MVP Scoping, UAT and Release Management, KPI Definition, System Architecture, API Integration, Data Privacy and PII Handling

Domains: B2B SaaS, Digital Lending, Loan Origination, Credit Underwriting, Business Rule Engines, Collections, Digital Onboarding, KYC and KYB, AI and LLM Products

Experience

Care Analytics and Advisory Pvt. Ltd. (CareEdge Group) — Mumbai, India

Senior Product Manager — **Apr 2026 - Present**

- Own **product strategy** and **roadmap** for a lending platform used by banks in three countries, covering core and AI products, from discovery with credit, risk and operations **stakeholders** through **prioritization**, delivery and post-launch adoption.
- **Built and lead** a **team of 4 product managers** on a **USD 1M+** bank engagement, owning **requirements**, **user research**, **solution architecture**, **UAT** and delivery; trained the team on FSD writing, workshop facilitation and **UAT** management.
- Advise bank leadership on **digital transformation** and lending process automation; designed a **straight-through-processing** journey for existing customers across multiple loan products, targeting a **90%** cut in turnaround time.
- Delivered **core banking integrations** with **Oracle Flexcube**, **TCS BaNCS** and **Temenos T24**, plus **API integrations** with **document management systems** and **credit bureaus**, aimed at decreasing loan processing time by 50%.
- Launched **AI features** into live credit workflows (bank statement analysis, financial statement reading, credit memo automation, document analysis), with **PII-risk controls** designed into each data flow.

Care Analytics and Advisory Pvt. Ltd. (CareEdge Group) — Mumbai, India

Product Manager — **Mar 2025 - Mar 2026**

- Ran **pre-sales** for banks and NBFCs across India, Sri Lanka, Bhutan and the Middle East: CXO discovery workshops, **proofs of concept**, **product demos**, **solution consulting** and onsite presentations.
- **Closed a USD 1M+ contract** end to end, from proposal and demos through client-leadership presentations to signature, the largest single deal of the period.
- **Wrote 15+ proposals** across LOS, mobile LOS, collections and collateral management, building a **USD 7M+** pipeline; turned a collections module idea into a signed deal within **2 months**.
- Managed a **team of 5** across 5 concurrent LOS implementations (**USD 1M+**), owning scope, budget and timelines to on-time go-lives.
- Shipped the platform's first **AI components** (credit memo automation, bank statement analyzer, data and policy chatbot) and architected a **report builder** that automated **MSME** credit underwriting reports.
- Led the LOS standardization and **UX redesign** through **user research** and workshops, targeting **20%** faster turnaround and **30%** faster implementations; cut onboarding clicks-to-complete by **30%**.
- Produced **training**, **hyper-care** and handover material (FSDs, SOPs, manuals, video walkthroughs) that enabled **95%+** task self-service by client operations teams within **30 days** of go-live.

Nucleus Software Exports Ltd. — India

Senior Software Engineer — **Sep 2020 - Jan 2024**

- Built and enhanced **FinnOne Neo**, a microservice based loan origination system covering lead to disbursement, for a Middle Eastern bank; **led 5 engineers** through **Agile** delivery of **10+ major customizations**.
- Wrote a parsing tool for loan-application data migration (**95%** faster) and a script migration utility that cut migration time from **1 day** to **10 minutes**.
- Automated debugging with a custom UI tool, cutting development time **90%**, and redesigned the code-review process used by **1,000+ employees**.
- Set up a three-tier environment structure (Local, Smoke, Quality) that reduced performance defects **70%**; standard development templates cut developer idle time **90%**.
- Presented customization proposals and product insights to CXO **stakeholders** at cross-border banking clients.

Predixion AI India

AI Product Management Intern **May 2024 - Aug 2024**

- Defined the **product vision** and architecture for a debt-collection product and designed a data-enrichment engine that improved decision accuracy.

Aditya Birla Insulators India

Developer Intern **May 2018 - Jul 2018**

- Built a business portal that digitized customer order processing, targeting an **80%** reduction in processing time.

Projects

Loan Origination System 2025 - Present

Care Analytics and Advisory, platform product owner

- **Lead-to-disbursement platform** for **MSME**, SME and retail lending, live at banks in India, Sri Lanka and Bhutan; replaced paper-heavy branch processes with a single application view, with UX standardization targeting **20%** faster turnaround and **30%** faster implementations.

AI Credit Suite 2025 - Present

Credit memo automation, bank statement analyzer, financial statement reader, document analyzer, data and policy chatbot

- Five **AI capabilities** running inside live underwriting workflows: **10%** turnaround reduction on statement analysis, **20%** reduction in relationship-manager turnaround from document triangulation, and natural-language access to loan data and credit policy for operations teams.

Business Rule Engine 2025 - 2026

Configurable eligibility, pricing, deviation and policy rules

- Removed the code release that every policy change used to need; credit and risk teams now change rules themselves with a full **audit trail**.

API Connector 2025 - 2026

Integration layer for core banking, document management, bureaus, KYC and payments

- **Reusable connectors** to **Oracle Flexcube**, **TCS BaNCS** and **Temenos T24** that replaced point-to-point integrations rebuilt for every client, cutting integration effort on new implementations.

Collateral Management System 2025 - 2026

Collateral capture, valuation, linkage and lifecycle monitoring

- Replaced spreadsheet tracking disconnected from the loan with one **collateral register** tied to exposure; proposed and sold as part of the **USD 7M+** pipeline.

TAT Monitoring System and Report Builder 2025 - 2026

Operations visibility and self-serve reporting

- Stage-wise turnaround tracking with **SLA breach alerts** and dashboards for operations leaders; a parameterized **report generator** that automated **MSME** underwriting and MIS reports analysts assembled by hand.

Straight-Through Processing Journey 2026 - Present

Automated lending for existing-to-bank customers

- End-to-end automated journey across multiple loan products, targeting a **90%** reduction in turnaround time.

Education

S.P. Jain Institute of Management and Research (SPJIMR) Mumbai, India

PGPM, Information Management 2023 - 2025

BITS Pilani, Pilani Campus Pilani, India

B.E., Electrical and Electronics Engineering 2016 - 2020

- **Pre-placement offer** from Nucleus Software

Certifications

- Professional Scrum Product Owner I (PSPO I), Scrum.org

Awards

- Star of the Quarter, two consecutive quarters, Care Analytics, for ideation, client delivery and **user research**

- SPOT Award and Most Innovative Team, Nucleus Software, for the code-review transformation and a cross-border implementation
- JEE Advanced **AIR 5,240, top 0.5 percentile** of 1.2M+ applicants
