PROFESSIONAL SUMMARY

- Product manager with around **5 years in banking technology**, currently owning the **AI product agenda** for an enterprise lending platform, having **launched five production AI capabilities** across credit appraisal, document intelligence and conversational access to loan data.
- Owens the full arc of an AI product: use-case discovery with credit and risk teams, requirement definition, **roadmap and feature prioritisation**, Agile delivery with **cross-functional** engineering, credit and operations teams, and adoption after go-live.
- Builds **AI for regulated environments**: PII-risk handling designed into every AI component shipped, with credit, risk, operations and technology stakeholders aligned at CXO level.
- Commercially fluent: independently **closed a USD 1M+ deal end-to-end** and authored 15+ proposals representing a **USD 7M+ pipeline**.
- Deep lending domain across **LOS, business rule engines, MSME/SME underwriting, collections, digital onboarding and KYC/KYB**, delivered in India, Sri Lanka, Bhutan and the Middle East.

AI PRODUCTS SHIPPED

- CAM Automation Agent**: AI-generated credit appraisal commentary across multiple SME risk dimensions, replacing manual analyst write-ups inside the credit decisioning flow.
- AI Bank Statement Analyzer**: automated statement spreading and borrower analysis with PII-risk controls designed into the data flow; **10% TAT reduction**.
- AI Financial Statement Reader**: automated extraction and interpretation of borrower financial statements under the same PII-risk controls; **10% TAT reduction**.
- AI Document Analyzer**: triangulates information across multiple document sources in the loan processing cycle; **20% reduction in relationship-manager TAT**.
- AI Chatbot (Database & Policy)**: natural-language interface letting operations teams query live loan data and policy guidelines without analyst support.

CORE COMPETENCIES

AI Product: AI Product Roadmap & Prioritisation • AI Use-Case Discovery • Document Intelligence & Extraction • Conversational / Natural-Language Interfaces • Underwriting Automation • PII & Data-Risk Handling • AI Integration into Core Platforms

Product Management: Product Lifecycle • Feature Scoping & MVP Definition • BRD / FSD Authoring • Go-to-Market Strategy • Agile / Scrum (PSPO I) • Design Thinking • User Research • Stakeholder Management • Executive Communication • Pre-Sales

Banking & Lending: Loan Origination Systems (LOS) • Business Rule Engine & Credit Decisioning • MSME & SME Credit Underwriting • Credit Appraisal • Collections • Digital Onboarding • KYC / KYB • Collateral Management • Lead-to-Disbursement Lifecycle

Technical: API Integration • System Architecture • Python • SQL / RDBMS • Core Java • Figma • JIRA • Advanced Excel

PROFESSIONAL EXPERIENCE

Senior Product Manager — Loan Origination System & AI

Apr 2026 – Present

Care Analytics and Advisory Pvt. Ltd. (CareEdge Group) • India

- Own the **AI product roadmap** for the lending platform: identifying credit and operations workflows where AI removes manual effort, defining requirements with credit and risk stakeholders, and sequencing the build.
- Designed and **launched four AI capabilities into live lending workflows** (CAM automation, Bank Statement Analyzer, Financial Statement Reader, Document Analyzer), each with PII-risk handling built into the data flow.
- Architected an end-to-end **straight-through-processing journey for existing-to-bank customers** across multiple product nuances, targeting a **90% TAT reduction**.
- Leading a **USD 1M+ engagement end-to-end**: requirements gathering, solution architecture and Agile delivery.

Product Manager — Loan Origination System

Mar 2025 – Mar 2026

Care Analytics and Advisory Pvt. Ltd. (CareEdge Group) • India

- Integrated the platform's **first AI components into production lending workflows**: CAM automation, AI BSA for automated financial spreading and borrower analysis, and an AI chatbot enabling natural-language querying of loan data and policy guidelines.
- Closed a USD 1M+ deal end-to-end**: independently led proposal authoring, product demos, stakeholder meetings and onsite presentations to client leadership through to signed contract; the largest single deal won in this tenure.
- Led a team of 5 across 5 concurrent end-to-end LOS implementations** for global clients valued at USD 1M+, coordinating **cross-functional** internal and client teams and owning scope, budget and timelines to achieve on-time go-lives.
- Architected a **Report Generator module** with API integrations, model formulation and parameterisation to automate **MSME credit underwriting workflows** and cut manual decisioning time.
- Spearheaded **standardisation and UX revamp** of the Loan Origination System through continuous user research and workshops, targeting **20% TAT reduction** and **30% faster implementations**.
- Ideated and formulated a **Loan Collections module** for a global client and converted the idea to a signed deal within **2 months**.
- Authored 15+ proposals** across LOS, Mobile LOS, Collections and Collateral Management, representing a **USD 7M+ pipeline**.

- Led **pre-sales discovery workshops with CXOs and functional heads** across India, Bhutan and Sri Lanka, drafting customised credit appraisal transformation solutions.
- Delivered UI/UX upgrades (dashboard widgets, responsive grids, brand-agnostic CSS framework) targeting **15% faster loan decision turnaround**, and upgraded the digital onboarding channel to cut **clicks-to-complete by 30%**.
- Delivered training, hyper-care and handover artefacts (FSDs, SOPs, user manuals, video walkthroughs) enabling **>95% task self-service** by client operations teams within **30 days of go-live**.

Senior Software Engineer

Sep 2020 – Jan 2024

Nucleus Software Exports Ltd. • India

- Built and enhanced **FinnOne Neo**, Nucleus' customer acquisition system covering the full lending lifecycle from lead generation to disbursement, for a **Middle Eastern banking client**.
- Led **5 engineers** through Agile delivery (stand-ups, backlog refinement, sprint planning) of **10+ major product customisations** aligned to banking requirements.
- Built a digital parsing solution for loan application migration between data formats (**95% faster**) and a script migration tool that cut data migration from 1 day to **10 minutes**.
- Automated code debugging through a custom UI tool, cutting development time **90%**; transformed the code-review system, impacting **1,000+ employees**.
- Architected a **three-tier environment structure** (Local, Smoke, Quality), reducing performance defects **70%**; standardised development templates cut developer idle time **90%**.
- Presented product insights and customisation proposals to **CXO-level stakeholders** at cross-border banking clients.

EARLY EXPERIENCE

- **AI Product Management Intern — Predixion AI** (May–Aug 2024): defined the IT vision for a debt collection product, built the product architecture enhancing UX, and designed a data enrichment engine that improved decision accuracy.
- **Developer Intern — Aditya Birla Insulator** (May–Jul 2018): built a business portal to digitise customer order processing, targeting an **80% reduction** in order processing time.

EDUCATION

PGPM – Information Management S.P. Jain Institute of Management & Research (SPJIMR), Mumbai	2023 – 2025
B.E. – Electrical & Electronics Engineering BITS Pilani, Pilani Campus Pre-Placement Offer from Nucleus Software	2016 – 2020

CERTIFICATIONS, AWARDS & RECOGNITION

- **Professional Scrum Product Owner I (PSPO I)** — Scrum.org
- **Star of Quarter, 2 consecutive quarters** — Care Analytics, for ideation, client delivery and user research
- **4 consecutive above-average appraisals** — CareEdge Analytics and Advisory, and Nucleus Software Exports
- **SPOT Award** — Nucleus Software, for transforming the code-review process across 1,000+ employees; **Most Innovative Team**, NSEL Annual Ceremony, for cross-border project implementation
- **AIR 5,240 in JEE Advanced** — top 0.5 percentile of 1.2M+ applicants
- Founded and scaled a **multi-cuisine café** — ₹2.5L+ revenue in 4 months; ERP implementation cut inventory cost from 55% to **45%**
